

# Punto Kart

This mobile aluminium-cast Kart with ceramic doctor console housing 5 instruments with hanging hoses can work as stand-alone equipment or be connected to your favourite dental unit. Since it can be moved around in a practice with no trouble and can be placed in unlimited positions, it fosters quick and accurate dental treatments, supporting assistant/dentist interoperability. It features a user-friendly, black-and-white display membrane keyboard for your instrument running and driving patient chair positioning. Punto Kart might be installed with all OMS chairs.
